

AGSC Ltd. Profile

Preface

As threats to the security of our society increase, so too must the countermeasures that we employ to maintain comprehensive assets' protection. These escalating conventional and non-conventional threats require ever more flexible thinking, tact and foresight to ensure our way of life. Nobody knows this better than Aviation & General Security Consultancy (AGSC Ltd).

Corporate Mission

To provide highly effective Comprehensive Security Solutions (CSS), counter- terrorism, criminal measurements and unique Security and Intelligence Technology.

CORPORATE BACKGROUND

Aviation & General Security Consultants (AGSC) is a Kenyan company that was established in 1990 by Col (ret) Ben Zion Arad. Total Security Management Ltd. (T.S.M) is an Israeli International company that was established in 1998 by Maj. Gen. (ret) Dror Itzhaki. The two companies were incorporated in Israel & Kenya, in order to provide comprehensive security and intelligence solutions, counter-terrorism and criminal services, and security integrated technology in Israel, Kenya and worldwide. The Incorporated Company was founded by a group of high-rank veterans of the Israeli Security Agency (ISA) and the IDF (Israeli Defence Force). A.G.S.C. is based in Kenya and operates in Kenya, Tanzania and other countries in East Africa.

The Company's founders bring years of experience as high-rank commanders in the Israeli security and intelligence services. In addition to their military and governmental experience, the Company's founders bring years of experience in the Vital Infra Structures, Aviation, Maritime & private security sectors, serving top-tier clients in diversified security projects.

The Company's founders and its experts' consultants now bring this unique experience and security expertise to the institutional and private sectors in the world.

The Company's founders and its experts' consultants bring a special blend of talents and extensive experience from Israel HLS, Kenya, Tanzania and the region, in all essential areas of security services, including threat analysis, security surveys, planning, design of Integration Security Management Systems (ISMS), supervision of the implementation, constant evaluation & updating, training, Innovative unique technology, executive protection, special situation and crisis management.
